

# **Energy-Aware Online Positioning of UAV Base Stations in Dynamic Networks**

A Project Report submitted in partial fulfillment of the requirements for the award of  
the degree of

**Bachelor of Technology**

in

**Electronics and Communication Engineering**

by

**Nikhil (112316031)**

**Visweswar (112316009)**

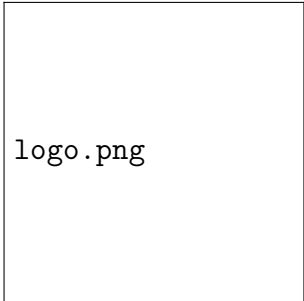

**Vinit (112316010)**

**Sangamesh (112316041)**

**Bhavya (112316012)**

Under the Supervision of: **Supervisor's Name**

**Semester: VI**

# Chapter 1

## Introduction

### 1.1 Background

### 1.2 Motivation

### 1.3 Objectives

# Chapter 2

## Literature Review

### 2.1 Base Paper Overview

### 2.2 Related Research

### 2.3 Existing Challenges

## Chapter 3

# Problem Statement and Research Gap

### 3.1 Problem Statement

### 3.2 Research Gap

# Chapter 4

## System Model

### 4.1 Network Architecture

### 4.2 Communication Model

### 4.3 Performance Metrics

### 4.4 Modeling Assumptions

# Chapter 5

## Proposed Energy-Aware Improvement

5.1 Baseline Positioning Method

5.2 Energy Consumption Model

5.3 Proposed Algorithm

5.4 Algorithm Workflow

# Chapter 6

## Simulation Setup

### 6.1 Simulation Environment

### 6.2 Simulation Parameters

### 6.3 Evaluation Criteria

# Chapter 7

## Baseline and Improved System Results

### 7.1 Baseline Results

### 7.2 Improved System Results

### 7.3 Comparative Analysis

# Chapter 8

## Result Analysis and Discussion

8.1 Movement Reduction Analysis

8.2 CSR Performance Analysis

8.3 Urban vs Rural Performance

8.4 Performance-Energy Trade-off

# Chapter 9

## Limitations

# Chapter 10

## Future Scope

- Multi-UAV coordination
- Reinforcement learning-based positioning
- Realistic UAV battery models
- Adaptive altitude optimization
- Real-world deployment studies

# Chapter 11

## Conclusion

# Chapter 12

## References
